Security Academy

With short, user-friendly videos, your employees will learn everything they need to know about information security, how to protect information and prevent leaks.

Learning made fun
The courses are created in the form of engaging animated videos.

Short videos
The average length of a course is set at 6-8 minutes. This is the effective length of the information communicated, to hold users' attention and enable them to absorb the content.

In four languages
Localised into Czech, Slovak, English and German (selected courses).

Testing
The courses end with a knowledge test.

Reporting
You get a clear report on the outcome of the course and also on the results of the final tests.

Created by IT security specialists
The courses are created by actual IT security specialists.

Webinars
Access to the webinars we hold in response to the current cyber situation.

Educational platform
Each course concludes with a **knowledge test** that provides the participant with immediate feedback and gives management a comprehensive overview of the overall level of security awareness within the organization. Based on the **analytical results**, weaknesses can be quickly and accurately **identified and followed up**.

We adapt to your needs

- Tailor-made courses can be ordered to suit your individual needs
- Customize the user experience with your company logo and colours

Choose the solution that suits you

Courses provided via our platform

Connect to our platform and you can start the whole learning process in no time. We will train your administrator, who will then be able to import and manage users, assign courses, create reports, schedule the training process and send email notifications. All with our support and maintenance.

Courses provided via your platform

Got your own platform and want to use just that for education? You can! We'll deliver the courses in a format that allows them to be easily deployed into your learning platform..
