# #1 in Enterprise IT

Aricoma is the largest provider of enterprise IT services and solutions in the Czech market. We are built on a solid foundation that reflects more than three decades of growth. Behind our success, you will find the ability to respond to market developments, a cohesive team of professionals with many years of experience, and a unique comprehensive portfolio of services and solutions.

We can address challenges in advanced IT infrastructure, across a broad portfolio of enterprise applications and digital solutions to support today's Digital Governments, and in cloud migration and cybersecurity.

We are part of the strong international investment group KKCG. We want to continue to grow in our domestic markets, and strengthen our cooperation with the EU institutions and our position in Western European markets.

We believe it is our duty to share our success. We therefore support organizations that are dedicated to people in need, but also support values such as freedom and democracy.

**We understand not only technology, but also the processes and the legislative framework.**

revenues

## 1 Enterprise Applications

Organizations achieve greater efficiency and cost savings through process automation and the digitalization of their procedures. Our portfolio includes ERP and CRM systems including marketing support, project management, service and human resources applications. We deliver BI tools, solutions for advanced document management and control, as well as e-commerce and also portal solutions.

## 4 Enterprise Cybersecurity

We have an experienced and strong team of experts, who are able to test new technologies within our own innovation lab. We help clients to solve today's most demanding security challenges individually, promptly and as efficiently as possible.

## 7 Services for EU Institutions

We help international bodies and institutions improve their IT infrastructure and services, so that they meet the modern needs of European Union citizens and current legislation. Our international team offers EU organisations Aricoma's full portfolio of services as well as specific solutions and expertise.

## 2 Digital Government Transformation

Years of experience allow us to design an appropriate strategy for the digitalization of government services. In our projects we apply our knowledge of processes and legislation as well as the latest knowledge from the fields of software development, cybersecurity, data protection or artificial intelligence.

## 5 Cloud Services

We offer services based on the use of public, private or hybrid cloud. For the cloud area we offer comprehensive consulting, integration and operational services, container and other application solutions.

## 3 IT Infrastructure

It all starts with the supply of hardware and software at the right price, and continues with the design and implementation of datacenter technology, business network, business communication and collaboration solutions or tools for effective IT management. All this is followed by services to support and ensure all IT operations.

## 6 Professional Services

Thanks to our know-how and years of experience in system integration, we are able to design, implement and manage extremely complex IT projects. We provide consulting services, training for IT specialists and users, and services for overall effective IT management.
